

Munken Print White

Our aim with Munken Print White was to develop the ultimate book paper by combining the best properties of woodfree and wood-containing paper. Thus we have created a quality with bulk, strength, surface, read- ability and printability especially for book production. The result is a high quality white shaded book paper with a feel and stiffness suited to most types of books, for colour or black and white print. Munken Print White comes in a wide range of bulks and grammages in sheets and reels, enabling the same quality to be used for both covers and inserts. There is also a cream version: Munken Print Cream. Munken Print White standard products are FSC™ and PEFC certified.
